CONES, CLAMPS AND SUCTION CUPS	9
CNC SPARE PARTS	10

The widest variety of cnc tools adapted to any brand and model of machine on the market. Production of kitchen and bathroom worktops, shower trays, washbasins, monuments, funerary articles, etc.

You can also find any spare part or component necessary for your cnc machining centre, such as suction cups, cones, filters, etc.

We work in collaboration with the main machinery manufacturers on the market, which ensures that we can offer the most suitable tool for each job and for each machine.

MILLING CUTTERS

Milling cutters for all types of materials.
We offer different hardnesses and working
speeds according to the preferences of each
customer.

DRILL BITS

Continuous, segmented and solid drill bits. Clean and fast drilling in the hardest and most delicate materials.

GRINDING RINGS

We have a huge variety of grinding rings. Granite, Quartzite... you will be able to grind any material you need, knowing the reference that best suites your work preferences.

KITCHEN COUNTERTOPS

Grooving routers, milling cutters, polishing of interior recesses, polishing of edges with multiple profiles.
High quality finishes on the most demanding materials.

FUNERARY

Many different tools for the manufacture of inscriptions, monuments and burials for any funeral work required by the professional

CONES, CLAMPS AND SUCTION CUPS

High quality cones are available to guarantee the precision and durability of your tools.

Our range of suction cups covers all market requirements, circular, square, rectangular, different heights and sizes.

Our suction cups are manufactured with carefully selected materials, ensuring great durability and suction capacity.

CNC SPARE PARTS

We can supply you with any spare parts your cnc machine needs.

Filters, pumps, connectors, hoses... etc.

Available for any machine on the market.
