# BLADES FOR BRIDGE CUTTERS

Aguila Global Stone has a wide range of blades for bridge cutters.

We have different blades for different materials, such as porcelain, marble, granite, quartz, quartzite or natural stone.

They adapt to the specific needs of each material, guaranteeing precise and efficient cuts.

# ***EVEREST*** **BLADE COLLECTION**

The EVEREST line is the top of the range of cutting blades aimed at the professional stone and ceramic sector. High precision, higher working speed and high durability are the characteristics of this family.

Available in 300mm, 350mm, 400mm, 450mm and 500mm diameters with semi-silent or silent core. Ready to be used on any of the existing bridge cutters on the market.

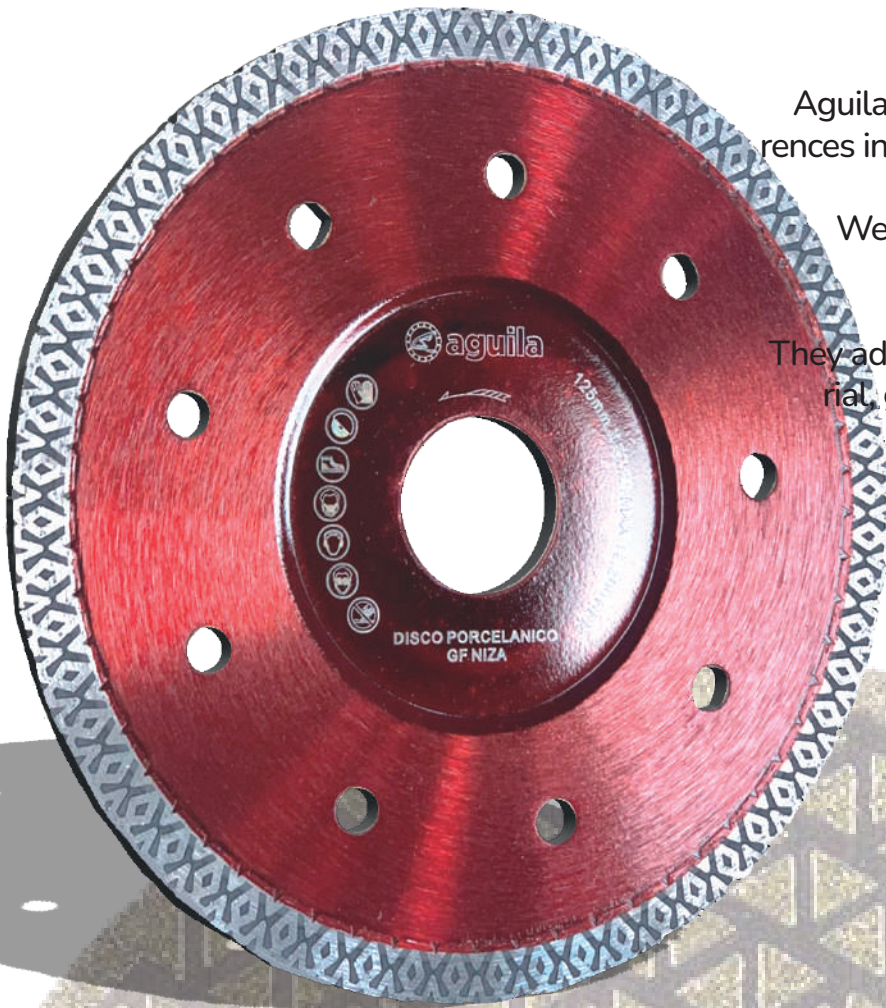

# BLADES FOR PORTABLE MACHINERY

Blades for portable machinery

Aguila global stone has a wide range of references in cutting blades for portable machinery.

We have different blades differentiated by external diameter and diamond size.

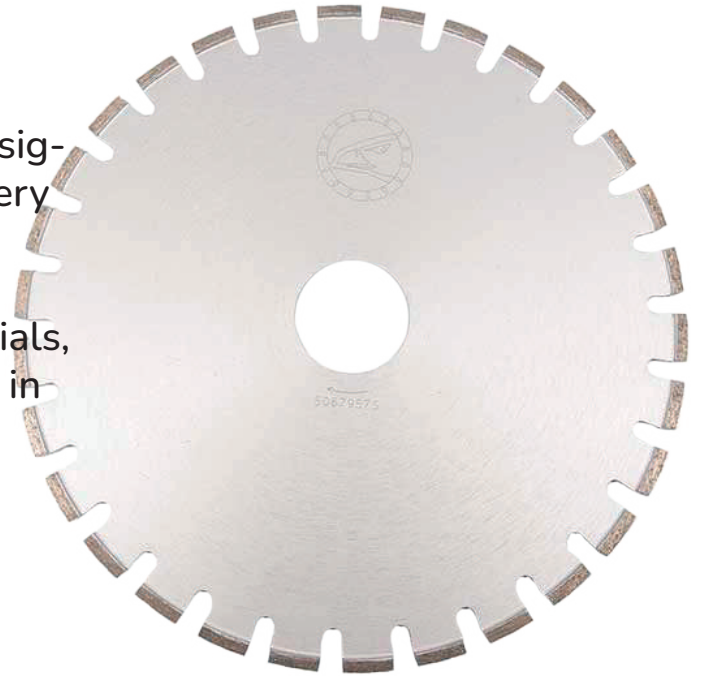

They adapt to the specific needs of each material, guaranteeing precise and efficient cuts.

# BRIDGE MILLING CUTTERS

Aguila Global Stone's cutting tools are designed to bring precision and efficiency to every job.

They are made from tough, durable materials, which means optimum performance, even in the most demanding working conditions.

# DRILLS

Aguila Global Stone offers a wide range of drill bits for drilling any material.

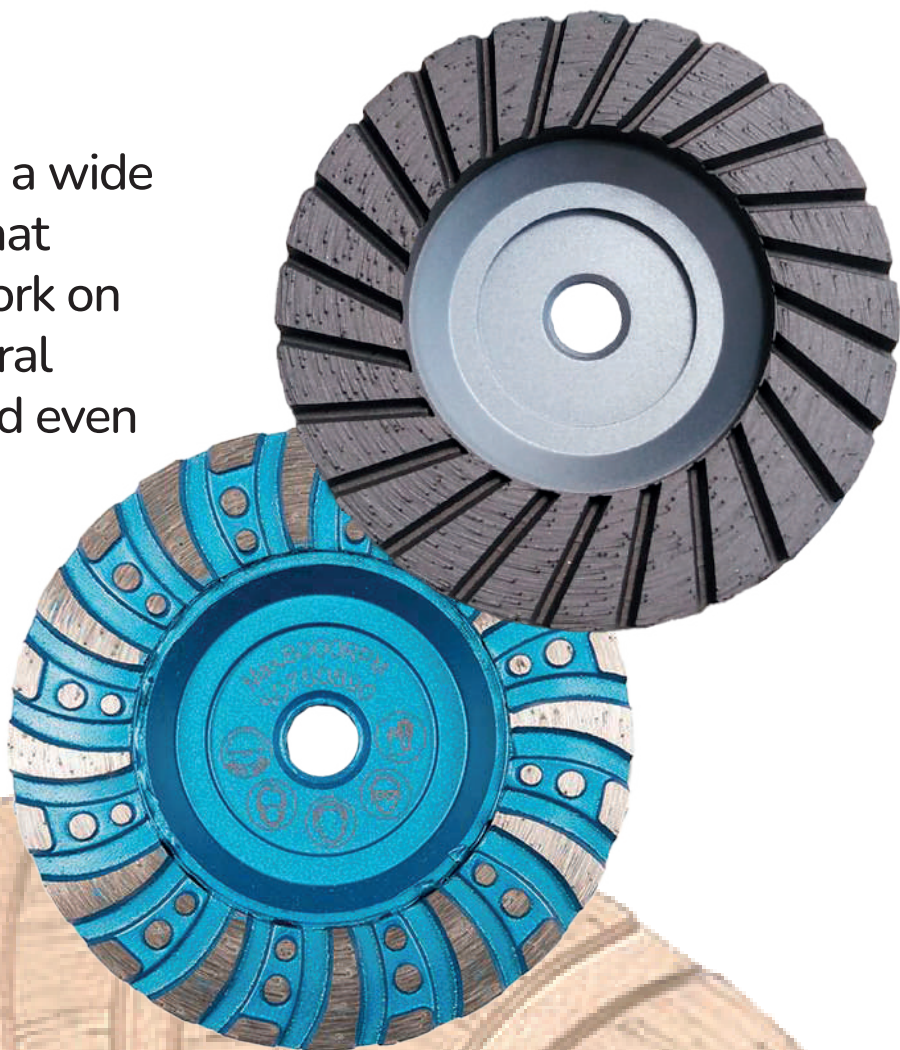

They are designed to maintain a high cutting capacity throughout their useful life, making drilling in a short time and without effort

# ROUGHING BITS

Aguila Global Stone has a wide range of roughing bits that enable clean and fast work on all types of granite, natural stone, marble, quartz and even sandstone.

# ACCESORIES & ADAPTERS

We have accessories and adapters for your cutting tools, please ask without commitment.
