CLAMPS

Aguila Global Stone's lifting clamps are designed to facilitate the safe and efficient handling of heavy loads. Their sturdy design allows a firm grip on various surfaces, optimising the lifting and transport process. Available in both manual and automatic versions.

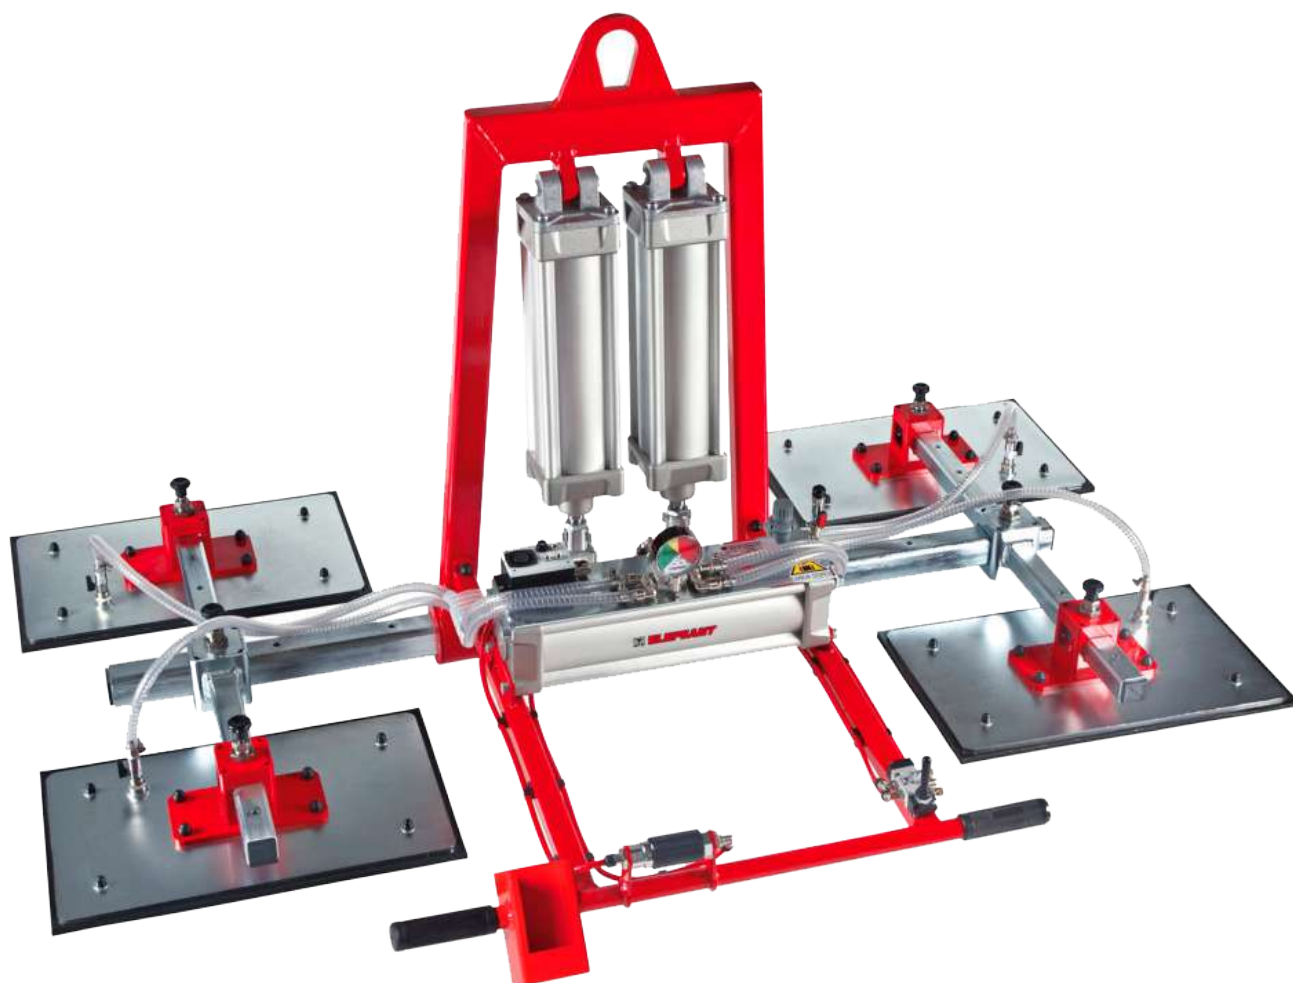

STORAGE

Robust and versatile solutions for organising and protect large slabs and tiles, optimising space and facilitating access to materials. Intelligent and durable design to ensure optimal optimal handling of the pieces.

TRANSPORT

Wide range of suction cups and machinery for the transport and handling of large-format parts. We work with *Elephant*, the leading brand in the sector, whose vacuum pads offer safety and performance when handling any type of part.

MANUAL SUCTION CUPS

Aguila Global Stone provides a wide range of manual suction cups with different designs and capacities. With options adapted to different surfaces, they provide a firm and secure grip, optimising the process of lifting and transporting all types of lifting and transporting materials of all kinds.

You can find both manual and automatic suction cups.

TOURNIQUETS

Aguila tourniquets stand out for their robustness, quality and durability, guaranteeing optimum performance in demanding working environments.

They are manufactured with high resistance materials that allow them to withstand continuous use and the adverse conditions typical of stone handling.
