We have a wide range of chemical products, mastics and adhesives, especially dedicated to natural stone and all types of ceramic materials, porcelain, quartz, etc. for treatment, protection, cleaning and maintenance.

We incorporate in our catalogue leading brands, as well as our own brand products, obtaining optimum results for more than 25 years.

POLYESTER MASTICS

Discover all the options we offer to repair, glue and fill marble, granite, natural stone and all types of quartz. We work with leading brands in our sector, such as *AKEMI*, *QMC*, etc.

We also offer our own brand range with a balanced quality/price ratio.

VINILESTER MASTICS

This is the most suitable adhesive for bonding porcelain and ultra-compact materials. Easy handling and polishing. Gluing straight and mitred edges and repairing small chips quickly and easily. We have the leading brand in the sector, *AKEMI*.

EPOXIC MASTICS

For those jobs that require maximum adhesion and resistance, we recommend single or multi-component epoxy mastics, depending on the type of work, materials and surface to be worked on. Consult our specialists who will recommend the most suitable product for each job

GLUES

Adhesives for professional use, processing and treatment of all types of marble, granite and natural stone, with an excellent quality-price ratio.

POLYMERS AND SILICONES

We work with the leading brands in polymers and silicones, such as *AKEMI*, *UHU*, *QUIADSA*, *FISCHER*, etc.

Essential for joints between worktops and countertops, sinks, shower trays... Everything you need to glue, fill and seal.

STONE TREATMENT

We have a wide range of colour protectors and intensifiers for all types of marble, granite and artificial stone. Treatments that are absolutely necessary to enhance the colour of the material, protect it and ultimately repair it. Consult our wide range of *AKEMI* colour protectors and intensifiers.

MANTENAINCE AND CLEANING

Remove all types of stains on any marble, granite, quartz, porcelain, etc. surface. Our technicians will indicate the ideal product, as well as its correct application. We have the full range of *AKEMI* references to solve all types of stains.
